ASSET MANAGEMENT

This guide walks you through Asset Management Policies and Procedures, Searching for Assets, Adding Assets, Adjusting Assets, Transferring Assets, Retiring and Reinstating Assets and Running an Asset Query.

State of Vermont

Department of Finance & Management

Revised October 2016

Revisions to Manual

October 2016:
- **Updated the FAQ section.**
- **Created a Helpful Hints section.**

APRIL 2010:
- **A new exercise has been added:**
    - entering a Capital Lease Asset

JUNE 2009:
- **Correction made to wording of the answer to the third question on page 89. Answer now reads:**

The asset will need to be retired and then re-entered as a **non-**depreciable asset. Follow the exercises in this manual on how to *Retire an "In Service" Asset* and the exercise to *Add an Asset using Basic Add*.

FEBRUARY 2009:
- **The following information has been added to all exercises pertaining to adding an Asset:**

If this is a **Donated** asset, you must select a **Trans Code** of "Donated"

This page was intentionally left blank.

Asset Management
October 2016

Frequently Asked Questions (FAQs):

What determines if an asset is *capitalized* or *expensed*?
The cost basis and useful life of an asset are the determining criteria of a capital / expensed asset. Any asset that has a useful life under 2 years and a cost less than $5000 is treated as an expensed asset; anything that is above those thresholds is capitalized. This means any asset, including computers; costing less than $5000 and having a useful life less than 2 years would have a profile associated with it that starts with an "E" (i.e., ECOMPUTERS).

What do I do if an asset location does not exist in VISION?
All location codes are created and maintained in Financial Operations. If you have an asset that is located at a site that there is no asset location for, send an email to Ruthellen.Doyon@vermont.gov and include the complete address and whether a purchasing or requisition location also needs to be setup.

What costs should I include in the acquisition cost of an asset?
Acquisition cost includes all expenditures that are necessary to place the asset into its intended location and condition for use. This includes the invoice purchase price and ancillary charges that are directly attributable to asset acquisition such as freight & transportation, in-transit insurance, duty, site preparation, assembly, and installation costs.

Helpful Hints

My asset was entered with the wrong Dept ID.   How do I fix it?
You can fix the Dept ID associated with an asset by doing a transfer. You can find information on doing a transfer in the Asset Management Manual. (Note: you can only do one type of change to the asset at a time. You could transfer the asset to another Fund at the same time you are fixing the Dept ID, as they are both performed with an action of transfer. You could not transfer the Dept ID and adjust the cost, as cost adjustments are an action of adjustment). Please remember, doing this transfer will not update the Asset Acquisition Detail page. This page is the history of how the asset was added. To see the impact of transfers and/or adjustments to an asset, look at Review Cost Information. (Navigation: Asset Management> Financial Management > History > Review Cost).

Where can I go to find the most current Asset Management Policies & Procedures?
The most recent Asset Management Policies & Procedures can always be found at the Finance & Management website under Policies & Procedures. Here is the link to the website: http://finance.vermont.gov/policies-and-procedures.

My asset was entered without (or with an incorrect) Dept ID. How do I fix it?
A transfer will need to be processed to move the asset into the correct Dept ID. Follow the exercise in this manual to *Transfer an Asset from one Dept ID to another (same Business Unit)*.

My asset was entered without (or with an incorrect) Fund. How do I fix it?
A transfer will need to be processed to move the asset into the correct Fund. Follow the exercise in this manual to *Transfer an Asset from one Fund to another (same Business Unit)*.

My asset was entered as expensed but should have been depreciable. How do I fix it?
The asset will need to be retired and then re-entered as a depreciable asset. Follow the exercises in this manual to *Retire an "In Service" Asset* and the exercise to *Add an Asset using Basic Add*.

My asset was entered as depreciable but should have been expensed. How do I fix it?
The asset will need to be retired and then re-entered as a non-depreciable asset.

Follow the exercises in this manual on how to *Retire an "In Service" Asset* <u>and</u> the exercise to *Add an Asset using Basic Add*.

<u>My asset was entered without (or with an incorrect) cost. How do I fix it?</u>
An adjustment will need to be done to correct the cost of the asset. Follow the exercise in this manual to *Adjust the Cost of an Asset*.

<u>My asset was entered with an incorrect quantity. How do I fix it?</u>
An adjustment will need to be done to correct the quantity of the asset. Follow the exercise in this manual to *Adjust the Quantity of an Asset*.

<u>My asset was entered without (or with an incorrect) location code. How do I fix it?</u>
Location codes of assets can be added or updated in Basic Add. However, you must check the "correct history" box on the "Find an existing value" page prior to entering into the asset because location fields are effective dated fields.

<u>My asset was entered without a description. How do I fix it?</u>
Asset Descriptions can be added or updated in Basic Add. You do not need to check the "correct history" box on the "Find an existing value" page prior to entering the asset because the description fields are not effective dated fields.
<u>Navigation is</u>: **Asset Management > Financial Management > Owned Assets > Basic Add > Find an Existing Value**.

<u>There are different types of location codes. How do I know which one to use for my asset?</u>
All asset locations begin with the letter "A" so these locations should be used when assigning a location to an asset.

<u>How can I find out who entered an asset or processed an accounting transaction for an asset?</u>
The USER ID is displayed on the Asset Cost History page and will show who entered an asset or processed an accounting transaction for an asset. To see this information, follow the instructions to *Inquire on the Cost History of an Asset*.

<u>How do I know what Category to use for an asset?</u>
Assets that have a cost greater than $5000 should have a category that ends with the letter D (e.g. VEHD). All assets that have a cost less than $5000 should have a category that ends with the letter E (e.g. COMPE)

Where can I find the Asset Inventory Verification Form to complete my Physical Inventory?

The Asset Inventory Verification Form is located on the last page of the Asset Management Procedure #1 found on the Finance & Management website under Policies & Procedures. Here is the link to the website: http://finance.vermont.gov/home

How can I transfer assets from one Business Unit to another Business Unit?

Expensed assets cannot be transferred from one BU to another BU. If you have depreciable assets that you want transferred, you must contact Financial Operations to request a transfer of an asset (or assets) from Business Unit to another Business Unit.

How can I retire a large number of assets at one time?

Finance & Management can process a Mass Disposal if you have more than 50 assets to retire at one time. Mass Disposals are reserved for special circumstances such as New Business Units or Statute Changes. Finance & Management will not grant requests for mass disposals if a Department is using it as a quick fix where regular asset maintenance has not been done.

What information will I need to request a new Profile ID for assets?

You should contact Finance & Management with a detailed item description of the asset that you are trying to create a new profile for along with the asset's useful life. Finance & Management will help you determine whether there is an existing Profile ID that can be used or if a new one is needed.

When can I run reports to see the depreciation that accumulated on my assets?

Each month between the 1st and 10th business day, Finance & Management runs a depreciation close process that posts all of the depreciation for the prior period. The depreciation close process is not run until **ALL** asset transactions are complete for the prior period. This process is delayed at year end because of the mass amount of transactions and inventory verifications that must be done prior to closing the books for the entire fiscal year.

Asset Management
October 2016

VISION Overview

Overview of the VISION process:
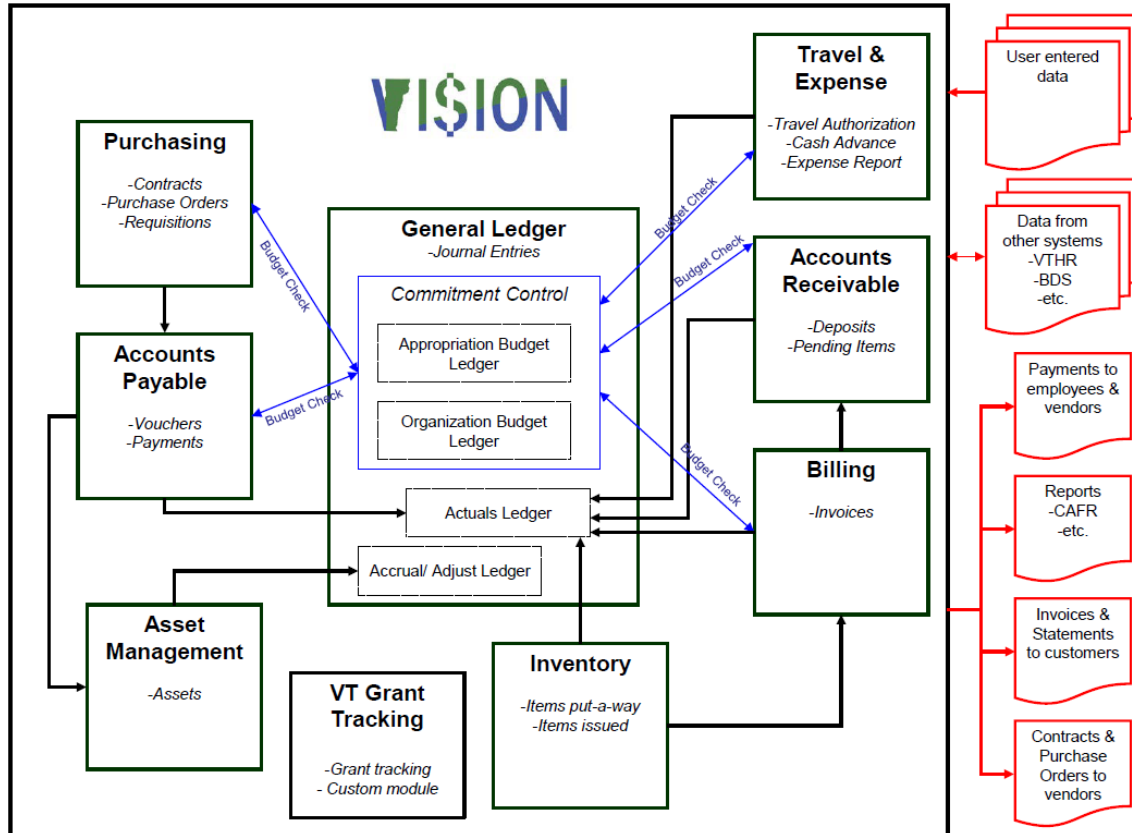

Asset Management Overview

Section 1: Asset Management Policies and Procedures

1.1 Guiding Documents

The State of Vermont, Agency of Administration, issued VISION Procedure #1, Asset Management Procedure, on May 1, 2004. It has subsequently been revised and the current version is dated May 1, 2007. This document is the State level guiding document for defining and tracking Assets in the VISION system. In addition, the Department of Finance and Management issued a Fixed Assets Best Practice #6 in December 2006. Departments should refer to these two documents first for information on this subject. You can find these documents at:

Asset Management Procedure #1
http://finance.vermont.gov/policies-and-procedures/vision-procedures

Intangible Assets Implementation Guide
http://finance.vermont.gov/policies-and-procedures/vision-procedures

Best Practice #6 – Fixed Assets
http://finance.vermont.gov/policies-and-procedures/internal-controls

1.2 Definitions

Fixed assets are long-term, physical resources of considerable value held for business use and not intended to be consumed or converted into cash any sooner than at least one year's time (e.g. buildings, equipment, vehicles, computers, furniture, etc.).

Capital assets, as defined by the State's capitalization policy, are fixed assets that cost at least $5,000 and provide future economic benefit for a minimum of two years.

Infrastructure assets, as defined by the State's capitalization policy, are physical resources utilized primarily by the public that cost at least $50,000 and provide future economic benefit for a minimum of three years (e.g. roads, bridges, dams, airports, etc.).

Capital Lease is defined as a lease for a period of time exceeding 12 months and which meets at least one of the following criteria:

a. It passes title to the lessee at the conclusion of the lease term.
b. It contains a bargain purchase option.
c. The lease term is at least 75% of the assets estimated economic life.
d. The present value of the minimum lease payments (discounted at the lower of the implicit interest rate or the incremental borrowing rate) equals or exceeds 90% of the asset's fair value at acquisition.

Non-capital assets are a physical resource that **does not** meet the capitalization cost thresholds (e.g. any asset that is less than $5,000 or has a useful life under 2 years).

Donated assets are any assets that are acquired by gift.

NOTE: Capital assets, infrastructure assets, and capital leases are all entered as **depreciated** assets in VISION. Non-capital assets are entered as **expensed** assets in VISION.

1.3 VISION Entry Requirements

The following assets are required to be tracked and maintained in VISION and recorded in the Asset Management module at the time of acquisition:

- All capital assets with a cost of $5,000 or more
- Buildings that are not associated with or part of an infrastructure asset
- All capital leases
- All land
- Art and museum collections
- All infrastructure assets
- Infrastructure improvements with a cost of at least $50,000 and future economic benefit of a minimum of three years
- All computer equipment with a cost of $1,000 or greater
- All software with a cost of $50,000 or greater
- Donated assets that meet the definition of a capital asset, infrastructure asset, or computer equipment with a cost of $1,000 or greater and software with a cost of $50,000 or greater.

Depreciation

State of Vermont uses a straight-line depreciation with a mid-month convention. This is a statewide standard that is set up in VISION. Each month between the 1st and 10th business day, Finance & Management runs a depreciation close process that posts all of the depreciation for the prior period. The depreciation close process is not run until **ALL** asset transactions are complete for the prior period. This process is delayed at year end because of the mass amount of

transactions and inventory verifications that must be done prior to closing the books for the entire fiscal year.

State of Vermont Required Fields

NOTE: Departments may define additional required fields as needed for their own business processes. The following fields are the minimum required fields to be used for any asset entered.

- Asset Information Page
    - Description
    - Tag Number
    - Acquisition Date
    - Acquisition Code
    - Profile ID
- Asset Acquisition Detail Page
    - Quantity (always = 1)
    - Amount
    - Category
    - Capitalization Code
    - Transaction Date (always equal to Acquisition Date)
    - Accounting Date (always date of entry)
    - Transaction Code (necessary/required **ONLY** for Donated Assets).
- Acquisition Details Page (except for Donated Assets)
    - AP Unit
    - Voucher ID
    - Vendor ID
    - Invoice Number
    - Invoice Date
- Acquisition Detail Chartfields Page
    - Fund Code (only for Internal Service or Enterprise funds)
    - Department
- Location/Comments/Attributes Page
    - Location (should begin with "A")
    - Comments - This field is required to be used for Donated Assets and/or when an asset has been retired. When an asset has been Donated, include the entity that donated the item. When as asset has been retired, include an explanation of what physically happened to that asset.

Search for an Asset

Possible situations when this function is used: To search for an existing asset.

Navigation: Asset Management > Search for an Asset

The Search for an Asset page will load.

Your default BU will appear in the Business Unit field. The Asset Status will default as In Service. This page allows for assets to be retrieved by many different fields.

Search for an Asset by the Profile ID

Enter **Business Unit**
- Leave as default **or**
- Enter the appropriate business unit

Enter **Profile ID**
- Enter the appropriate profile id

This search retrieved all assets in BU 01110 that are coded with dept id of 1110000000. You can then click on any other tab to look at further information (Asset Cost Information/Acquisition Details/More).

Add an Asset using Basic Add

Possible situations when this function is used: To add a new asset into Asset Management that does not have a split cost. For assets with split cost use the Add an Asset using Express Add exercise.

Navigation: Asset Management > Financial Management > Owned Assets > Basic Add

Note: Basic Add can be used to add both expensed and depreciable assets.

To enter an <u>expensed</u> asset (value < $5,000), you must use a <u>category</u> that ends in "E" and a <u>profile id</u> that begins with "E".

To enter a <u>depreciable</u> asset (value > $5,000), you must use a category that ends in "D" and a profile id that begins with "D".

The Find an Existing Value page will load.

Click on the Add a New Value page. The Add a New Value page will load. Your default BU will appear in the Business Unit field. The Asset ID field will default as 'NEXT'.

Enter

Business Unit
- Leave as default **or**

- **E**nter the appropriate business unit

Asset ID Field
- **Always** leave as default 'NEXT'

Click **Add**

The Asset Information Page loads.

The asset status will default as In Service.
The Acquisition Date will default with the current date. The Acquisition Code will default as Purchased. The Parent/Child field will default as None. New Asset will be checked.

Enter the **Description**

- Enter a complete description of the asset
- A detailed description makes yearly inventory much easier and faster for your Department

Example: Rather than "Computer Monitor", enter "Samsung SyncMaster912N Monitor"

Asset Management
October 2016

Click **Taggable Asset only if the asset is a tangible asset. Please use the Asset Management Procedure #1 & Intangible Asset Implementation Guide to determine if the asset is taggable.**

Enter **Tag Number**
- Enter the assigned unique tag number for the asset

Enter **Acquisition Date**
- This is the date the asset was acquired

Enter **Acquisition Code**
- Leave as default **or**
- Choose appropriate acquisition code

Example: If the asset was donated, choose an acquisition code of "Donated"

Enter **Profile ID**
- Choose the appropriate profile id

Example: The Profile ID must begin with an "E" for an expensed asset; for a depreciable asset, the Profile ID must begin with "D".

Asset Basic Add has been saved. An Asset ID will be assigned in the upper left side of the page.
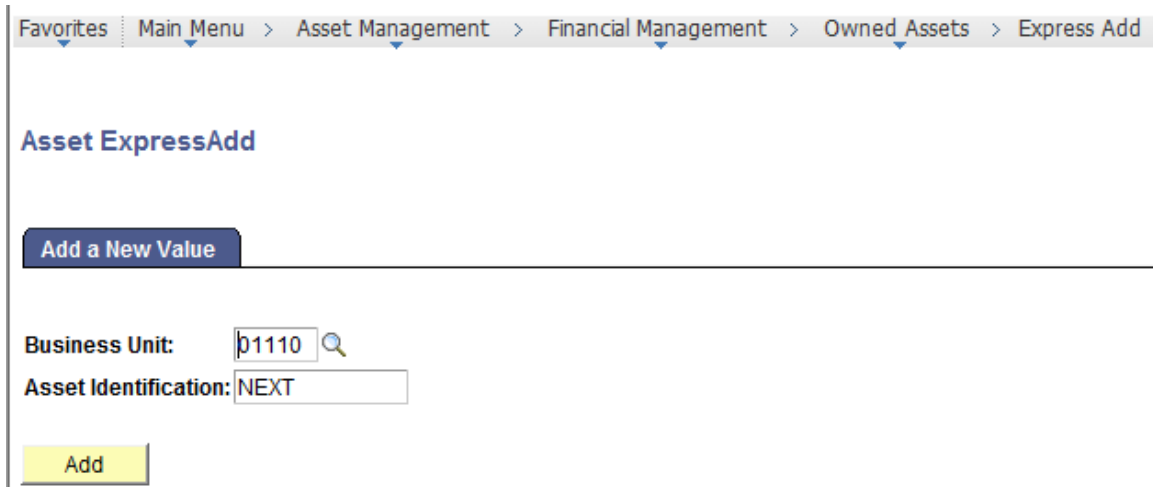

Add an Asset using Basic Add is now complete

Add an Asset using Express Add

Possible situations when this function is used: To add a new asset into Asset Management or to add an asset with split cost.

Navigation: Asset Management > Financial Management > Owned Assets > Express Add

NOTE: Express Add can be used to add <u>both</u> expensed and depreciable assets.

Favorites | Main Menu > Asset Management > Financial Management > Owned Assets > Express Add

Asset ExpressAdd

Add a New Value

Business Unit: 01110 🔍
Asset Identification: NEXT

Add

The Add a New Value page will load. Your default BU will appear in the Business Unit field. The Asset ID field will default as 'NEXT'.

Enter **Business Unit**
- Leave as default **or**
- Enter the appropriate business unit

Asset ID Field
- **Always** leave as default 'NEXT'

Click **Add**

The Cost/Asset Information Page loads.

The Trans Date and Acctg Date will default in as the current date. The Currency defaults to USD. The Rate Type defaults to CRRNT. The Quantity defaults to 1.0000.

Enter **Profile ID**
- Choose the appropriate Profile ID

Example: The Profile ID must begin with an "E" for an expensed asset. The Profile ID must begin with a "D" for a depreciable asset.

Enter **Description**
- Enter a complete description of the asset
- A detailed description makes yearly inventory much easier and faster for your Department

Example: Rather than "Car", enter "2008 Chevrolet Impala"

Enter **Location Code**
- Enter the appropriate location code. (It must begin with "A".)

Asset Management
October 2016

Note: If this is a <u>Donated</u> asset, you must select a **Trans Code** of "Donated"

Enter **Tag Number**
- Enter the assigned unique tag number for the asset

Enter **Trans Date**
- This date is equal to the date the asset was acquired

Enter **Acctg Date**
- <u>**Always**</u> leave as the current date default

Click on **Default Profile**

Asset Management
October 2016

In the Asset Cost Information section, the Category will populate with the category that is linked to the Profile ID that was entered on the Cost/Asset Information Page. In the Asset Additional Information section, the Asset Class will default. The Asset Status will default to In Service. The Acquisition Date will default to the Trans Date that was entered on the Cost/Asset Information Page. The Acquisition Code will default to Purchased. Parent/Child will default to None. Taggable Asset and Capitalized Asset will be checked.

Enter **Amount**
- Enter the appropriate cost of the asset

Enter **Chartfield Information**
- Enter appropriate chartfield information for the asset

If this is a split cost asset, click the blue + button to add an additional row of Asset Cost Information. Repeat the above two steps for the new row.

Note: The combined quantity of all Asset Cost Information rows must total 1.0000. (Example: If row 1 = .7500 the row 2 must = .2500)

Note: The combined cost of all Asset Cost Information rows must total the full cost of the asset.

Click **Save**

Update Asset Information

(Location, Description, Tag Number, Serial ID, etc.)

Navigation: Asset Management > Financial Management > Owned Assets > Basic Add

NOTE: Some of these fields are <u>effective dated</u> and others are not. We advise you to always click on the "Correct History" when making these types of changes to an asset.

Asset Basic Information page loads with Find an Existing Value tab open.

Enter **Business Unit**
- Leave as default **or**
- Enter the appropriate business unit

Enter **Asset ID** or **Tag Number**

Click on **"Correct History"** box

Click **Search**

The asset loads with the **Asset Information** tab open.

These fields can be updated on the Asset Information page:

- Description
- Tag Number
- Asset Class
- Acquisition Date
- Acquisition Code

Click on **Asset Acquisition Detail** tab.

Asset Management
October 2016

Here you can update: **Description**   (Must match the description entered on the previous tab)

In the Asset Acquisition Detail section, you can click on **Interfaces Info** and make necessary changes to the AP information (AP unit, Invoice Number, Invoice Date, Vendor ID, and Voucher ID).
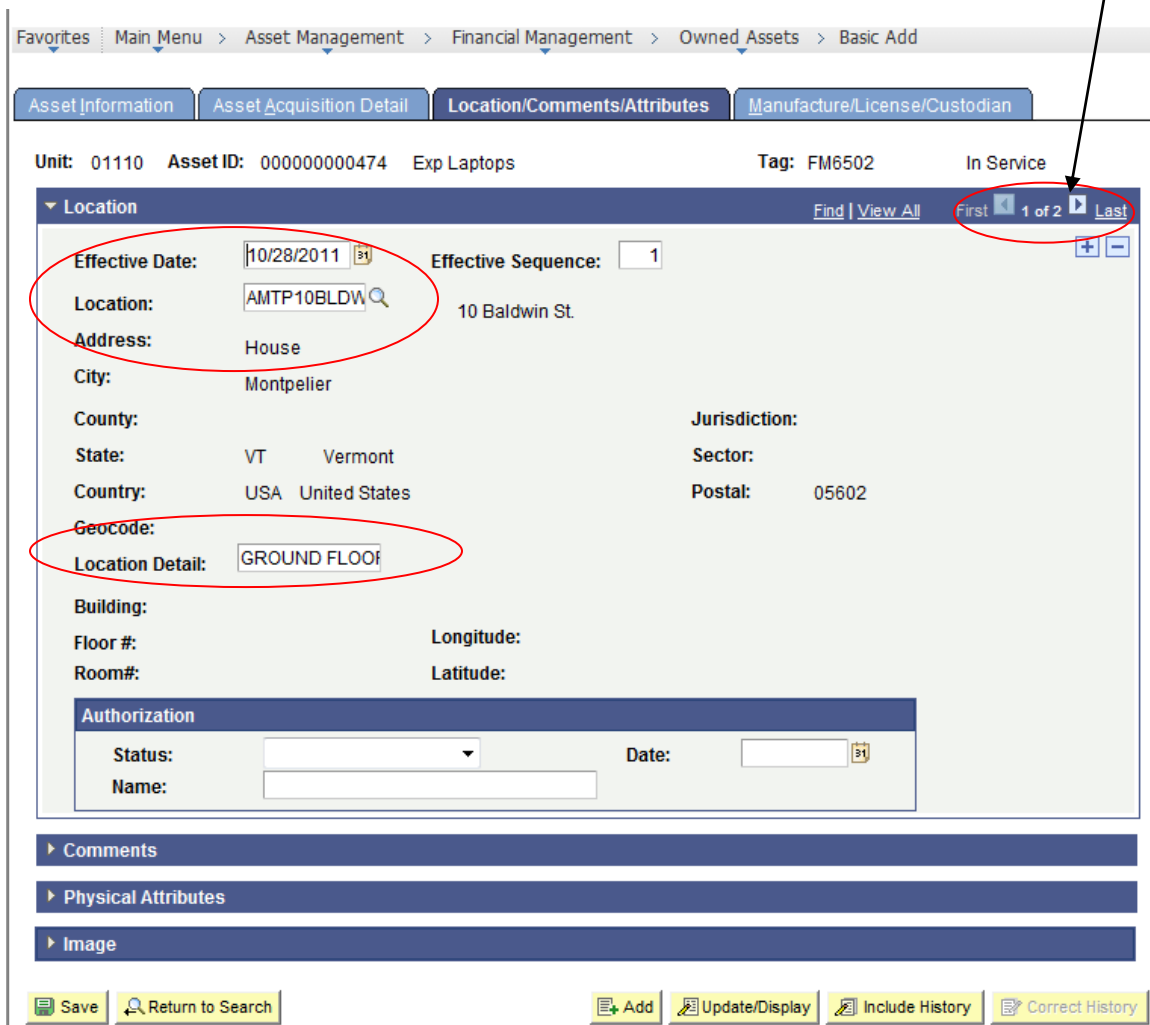

Click **OK**

Asset Acquisition Detail tab opens back up.

Asset Management
October 2016

Click on **Location/Comments/Attributes** tab. Here you can update the following items:

- **Effective Date** (must match **Trans Date** on the Asset Information tab)
- **Location**
- **Location Detail**

Click on the ⊞ to add a new Location page. You will see the 1 of 1 change to 1 of 2. Enter the effective date, Location and Location Detail for this change in asset location.

Asset Management
October 2016

Click on **Manufacturer/License/Custodian** tab. Here you can update the Serial ID, Manufacturer Name, Model, etc., if dictated by your Department.

Favorites | Main Menu > Asset Management > Financial Management > Owned Assets > Basic Add

Enter an Asset Related Voucher

Situations when this function is used: Entering an Asset related voucher is similar to creating a Regular Voucher with the addition of entering the asset related information within the asset tab of the distribution area. Voucher distribution lines containing Asset Management information are passed directly to the Asset Management module via the Asset Management /AP interface processes.

Navigation: Accounts Payable > Vouchers > Add/Update > Regular Entry

Your default BU will appear in the Business Unit field. Voucher ID will default as NEXT.

Much of the voucher information can be entered in the voucher add function or entered later in the voucher pages.

Enter **Business Unit**

- Leave as user default or

Asset Management
October 2016

- Enter appropriate business unit

Enter **Vendor ID**
- Enter the vendor number and be sure to include all of the zero's and tab out of the field. Short Vendor Name, Vendor Location, and Address Sequence Number populate

Note: If you need to search for a vendor use the following navigation: Vendors > Vendor Information > Add/Update > Vendor. Please see the 'Looking Up Vendors' exercise in the Accounts Payable Manual starting on page 14.

Enter **Invoice Number**
- Enter Vendor's Invoice number. (If the payment is for goods or services received in a prior fiscal year then prefix with a **"PY"**)

Note: If a vendor's invoice number is not provided, enter relevant information to correlate the voucher to the payment request; for payments to grantees and sub-grantees, the grant agreement number must be entered per the Agency of Administration's Bulletins #5 and #5.5.

Enter **Invoice Date:** As per the vendor's invoice

Enter **Gross Invoice Amount**

Favorites | Main Menu > Accounts Payable > Vouchers > Add/Update > Regular Entry

Voucher

| Find an Existing Value | Add a New Value |

Business Unit:	01110
Voucher ID:	NEXT
Voucher Style:	Regular Voucher
Short Vendor Name:	STAPLES#16-001
Vendor ID:	0000003393
Vendor Location:	SINGLE
Address Sequence Number:	1
Invoice Number:	
Invoice Date:	10/20/11
Gross Invoice Amount:	200.00
Estimated No. of Invoice Lines:	1

Add

Click **Add**

The Invoice Information page loads.

The information entered on the Add a New Value page has populated the fields on the Invoice Information page. The following information defaults in: Accounting Date = current date, Currency = USD, Distribute by = Amount, Ship To = default ship to location for your Business Unit & GL Unit defaults in.

Scroll down the screen and the Invoice Lines box can be seen.

Enter **Line Description**

- Enter the description of what you are paying the invoice for

Asset Management
October 2016

Enter **Quantity**

- Enter the number of items on the invoice

Enter **Account Number**

- Enter the account number or
- Click on the magnifying glass to select from the list

Enter **Fund**

- Enter the fund or
- Click on the magnifying glass to select from the list

Enter **Dept ID**

- Enter the Dept ID or
- Enter the last 4 digits of your business unit (to narrow your search) and click on the magnifying glass to select from the list

Enter **Program** (If used by your department)
Enter **Class** (If used by your department)
Enter **Project/Grant** (If used by your department)

Click on the **Assets Tab**

Assets tab opens.

Click on **Use One Asset ID**

- Assigns a single Asset ID to multiple distribution lines

Click on the **Asset checkbox**

New boxes open to enter asset information.

Enter the **Asset Management Business Unit**

- Enter the AM Business Unit or
- Click on the magnifying glass and select from the list

Enter the **Asset Profile ID**

- This field determines the depreciation of the asset. Profile ID that starts with "E" is used for items with cost less than $5,000. Profile ID that starts with "D" is used for items with a cost of $5,000 or more.

Leave **Asset ID as "NEXT"**

- This allows the AM system to assign the next appropriate asset_id for the given Business Unit.

Click **Save**

The warning message below will appear if entering in $5000.00 or more.

Click **OK**

Voucher is saved and a Voucher ID number has been assigned. Batch processes are currently run manually by Financial Operations to put the asset information entered on the voucher into the Asset Management module. It may take up to 3 business days for the processes to be completed and the asset to be created in Asset Management.

The asset will need to be updated in Asset Basic Add to include required information that does not flow in from the Accounts Payable module such as Tag #, Location ID as well as any other information the department chooses to add. Follow the exercise in this manual to Update Asset Information.

Enter an Asset Related Voucher is now complete

Enter a Capital Lease Asset

NOTE: **Before entering a capital lease into VISION, you will need a Lease Agreement, including interest rates and principal amounts. The Department also needs prior approval before entering into a Capital Lease. For information and guidance for leasing office or other equipment go to:** http://aoa.vermont.gov/sites/aoa/files/SecMemo/10-13-2005_Capital_vs_Operating_Lease.pdf

This guidance document also defines a Capital Lease. Capital Leases must be for a period of time exceeding twelve (12) months and meet at least one of the following criteria:

- Lease Term is greater than 75% of the asset's estimated economic life;
- Lease contains an option to purchase the asset for less than fair market value;
- Ownership of the asset is transferred to the lessee at the end of the lease term; and/or
- Present value of the lease payments equals or exceeds 90% of the asset's fair value.
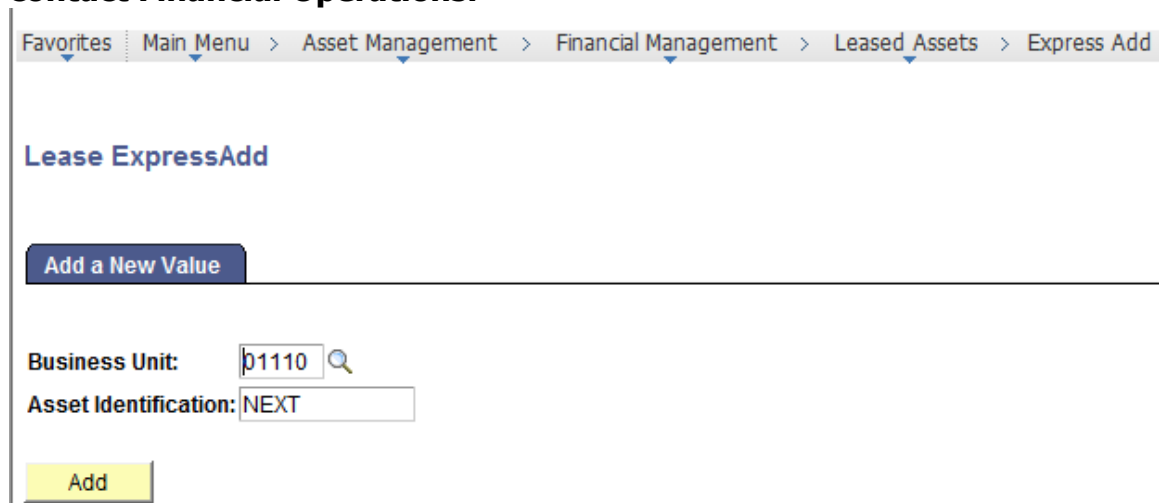

Note: Prior to entering a Capital Lease into VISION, determine the lease inception date. If this date is in a prior period/month you must contact Financial Operations.

Asset Management
October 2016

Navigation:

> *Asset Management > Financial Management > Leased Assets >*
> *Express Add*

The Lease ExpressAdd page will load. Your default BU will appear in the Business Unit field.

Note: Prior to entering a Capital Lease into VISION, determine the lease inception date. If this date is in a prior period/month you must contact Financial Operations.

Click **OK**.
Click on the **Cost** tab.

The **Cost** page will load. The asset **Description** and **Cost** will default.

Click on the **Chartfields** tab.

Enter the appropriate **Chartfield** information.

Click on the **Payment Schedule** tab.

Asset Management
October 2016

The **Payment Schedule** page loads. The Payment Date, Interest Expense and Obligation Reduction default in as calculated by the system based on the Trans Date that was previously entered. The Payment Total column equals the Minimum Rental Payment previously entered.

Note: Above the **Payment Type** column, the page only shows lines 1-8 of 36 for the payment schedule. If you click on View All, the page will load all lines of the payment schedule. **The Payment Schedule information should never be updated unless instructed by Financial Operations.**

Click **Save**.

This Warning Message may appear (depending on the terms previously entered):

Click **OK**.

The Capital Lease has been saved.

An **Asset ID** will be assigned in the upper left hand corner of the page.

Enter a Capital Lease Asset is now complete

Adjust the Cost of an Asset

Possible situations when this function is used: To adjust the cost of an asset that is currently in Asset Management, due to revaluation. To adjust the cost of an asset that was originally entered into Asset Management with an incorrect cost.

VISION Asset Management allows for assets to be adjusted once they are entered. The cost, quantity, and chartfield information can be adjusted. The cost and quantity are considered an <u>adjustment</u> in AM. The chartfield information is considered a <u>transfer</u> in AM.

Only one type of adjustment can be done at a time. For example: If an asset was in the system with an incorrect cost and incorrect Dept ID, the cost would need to be adjusted and saved, then the Dept ID would need to be transferred and saved in two separate transactions.

Adjust the Quantity of an Asset

Possible situations when this function is used: To adjust the quantity of an asset that was loaded through Accounts Payable with an incorrect quantity. To adjust the quantity of an asset that was manually entered into Asset Management with an incorrect quantity.

Note: Each asset in VISION should have a quantity equal to 1.000.

VISION Asset Management allows for assets to be adjusted once they are entered. The cost, quantity, and chartfield information can be adjusted. The cost and quantity are considered an underlined adjustment in AM. The chartfield information is considered a transfer in AM. Only one type of adjustment can be done at a time.

For example: If an asset was in the system with an incorrect cost and incorrect Dept ID, the cost would need to be adjusted and saved, then the Dept ID would need to be transferred and saved in two separate transactions.

Inquire on the Cost History of an Asset is complete

Run the VT_AM_ASSET_LIST query to Excel

Possible situations when this function is used: Used during Year End Inventory. A copy must be submitted with the Asset Inventory Verification Form at year end. May be used throughout the year for mid-year inventories, monitoring progress of asset additions/deletions, etc.

Per the Asset Management Procedure, issued May 1, 2004 and revised May 1, 2007, all Departments must conduct and complete an annual physical inventory between May 1 and June 1 and ensure that all additions, deletions, and transfers of assets have been properly recorded in VISION. The VT_AM_ASSET_LIST query is required to perform this task. When all asset information is complete in the VISION Asset Management Module by June 15, re-run the VT_AM_ASSET_LIST query to Excel and include a copy of the data with a signed Asset Inventory Verification Form to Financial Operations by June 20.

Navigation: Reporting Tools > Query > Query Viewer
